2. Mount it to /mnt: Mount the Android partition you extracted earlier in this process and remove any existing partitions created. The root partition (/mnt) of the partition that you want will stay, but you'll need to create a new one. I've chosen to create the new partition on an optical media drive (I used an internal one for this project to reduce data retention issues and maximize space utilization). Next, create a 2GB partition for storage and rename it /data. After changing the partition designation, you'll be prompted to enter your full name when prompted.. 6. Before the device reboots, you need to install the latest Android NDK.
3. Click on Connect.. A partition system file for the kernel named kernel-cache-dev-1. The partition file for the kernel named kernel-cache-dvfs-1.
