The article is NOT titled how to effectively manage large numbers of images in one go per what Simon wants.. A file can only be in one folder at a time so if you divide your photos up by topic how do you decide where a photo should go If you have a photo with both Mary and Susan should it go in the Mary folder or in the Susan folder Perhaps you duplicate in both folders but then what happens when you have a larger group of people Do you duplicate the photo in all of their folders too rapidly filling your hard drive and making it difficult to track And then when you come to make adjustments to that photo do you have to find it in all of those locations to update those copies too.. In Google photos settings you can also use mobile phone data to back up photos but if you don't have unlimited data I don't recommend it. [Download Ozzy Osbourne Diary Of A Mad Men 2011 Rar](#)
